Abstract

Our abilities to respond very fast, to juggle very fast, etc. are beyond the ability of our body's nervous system to react fast. They remain unexplained and demand revision of our concept that we are only a material body. Maybe the fast response is done through the waves of the electromagnetic field (EMF), which some people see as aura. This EMF (aura) can be seen and photographed in high frequency electric field, which multiplies the photons, making them visible to everybody and possible to photograph. I measured for almost 40 years this weak EMF and found it to be nonlinear (NEMF). Is our NEMF (seen as aura) living in symbiosis with our material body? Symbiosis is coexistence of two entities, in which each benefits from the presence of the other. Thus, symbiosis would allow the material body to benefit from the fast running waves of the NEMF, allowing fast reactions. If the life of our material body depended only on the slow response of our nervous system, we would be dead long time ago. 1/ The waves of our NEMF by allowing fast response tremendously increase our chances for survival. 2/ The waves of our NEMF allow almost unlimited ability to adapt – the waves scan the environment and send signal to the material body to change to adapt the new environment. 3/ With the waves of our NEMF operate a powerful Super-Computer in the Subconscious, of which we are not consciously aware. If a hypnotized individual (with sleeping Conscious, which allows to reach the Subconscious) can calculate 10,000 times faster, we must have in the Subconscious a very powerful computer. Since it works with waves it is a Quantum Computer. It is also the source of our full and partial intuitive creativity and our telepathic abilities.

Key words: symbiosis; symbiosis material body – NEMF (aura); fast response through NEMF; fast adaptation through NEMF; Quantum Computer in the Subconscious; Quantum Computer operating with NEMF-waves; Quantum Computer and telepathy; Quantum Computer and intuitive creativity.

1 | INTRODUCTION

Black Holes of dark anti-matter create the material world and the NEMF that separates the anti-matter from the matter is imprinted on all material creations (1). For that reason, the whole material world (alive and not alive) is dark material bodies and light nonlinear electromagnetic field (NEMF). We, the humans, are also a dark material body and light NEMF, which I measured for almost 40 years. We see it as aura ('orr' means 'light' in Hebrew).

Hypnotists know that when they put the Conscious to sleep to access the Subconscious, the Subconscious contains a full record of the whole lifetime. To have such large storage capacity the recording must be holographic, i.e. done with waves. Hypnotists also found with surprise that people with sleeping Conscious calculate 10,000 times faster, which could only be done with waves. It seems that we have a Super-Computer in the Subconscious with a very high speed of computation and a very large storage capacity, of which we are not consciously aware (2).

The Super-Computer in the Subconscious is obviously a Quantum Computer, which operates with the waves of our NEMF (seen as aura and called also Spirit). Since the whole material world is a dark material body and light NEMF, we should be able to communicate through NEMF with all animals and plants (3). It seems that all living beings have a dark material body, light NEMF, and Quantum Computers in the Subconscious working with the waves of their weak informational NEMF, through which they can communicate.

The Creator, who is obviously Supreme Intelligence, wanted all living beings to be able to gain experience in more than one lifetime. For this purpose, He made the light NEMF (Spirit), which being nonlinear does not dissipate, to be able to leave the already worn-out material body and enter a new material body. This is called re-incarnation of the Spirit and it is a specific feature of all living beings. Thus, we are dark material bodies and light NEMF and they live in symbiosis.

While the dark material body needs food to sustain its existence, the light NEMF called Spirit needs Love.

How do I know this? According to the studies of the HeartMath Institute in California (4), meditation on Love makes the EEG and ECG of the material body more harmonic. How is this done? It is not by chance that the Emotional Brain and the Quantum Computer operating with the waves of the Spirit (NEMF), which rules and regulates everything in the body (5), are both in the Subconscious. Our Emotions come with the Spirit and the emotion of Love, by making the vibrations of our Spirit (NEMF) harmonic, makes the functioning of all our organs harmonic.

2 | REVEALING THE SECRETS OF THE FAST ACUPUNCTURE RESPONSE

In 1983, at the 8th World Congress of Acupuncture, I reported a nonlinear mathematical model describing one acupuncture meridian (6, 7). Nonlinear equations have more than one solution and my equation had two types of solutions - electric impulse and electromagnetic wave. Based on this, I announced that each acupuncture treatment is expected to generate electric impulse and electromagnetic wave. The Chinese Prof. Zhu (8) already experimentally measured electric impulses running from the treated acupuncture point in the direction of the acupuncture meridian. His findings were in agreement with clinical observations - some patients do sense that electric impulse is generated at the treated acupuncture point and it is running in the direction of the acupuncture meridian.

However, nobody has registered waves running from the treated acupuncture point in direction of the acupuncture meridian. I bravely stated that waves must also run from the treated acupuncture point in direction of the acupuncture meridian, i.e. both elec-

tric impulses and waves must run from the treated acupuncture point in the direction of the acupuncture meridian (determined by existing body DC potential at rest).

The theoretically predicted waves were experimentally found a year later by the Hungarian scientist Dr. A. Eory (9). This was the first attempt to register traveling waves running from the treated acupuncture point in the direction of the acupuncture meridian. He found that waves do run in the direction of the acupuncture meridians all the time, but when a point of the acupuncture meridian is treated with a needle, a wave is generated which modifies the constantly running wave.

However, more detailed measurements are necessary to determine the speeds of propagation of these waves. The mathematical model predicted two types of traveling waves, called slow and fast wave trains. Obviously, two types of waves (slow and fast) are generated at each acupuncture treatment. They propagate along the acupuncture meridian and propagate in the direction of the meridian determined by the body's DC potential gradient at rest.

I want to emphasize that if acupuncture works through waves, these must be the waves of our nonlinear electromagnetic field (NEMF), which is located in the Subconscious. From the Subconscious, this weak informational NEMF rules and regulates the functioning of all our organs and the whole body and determines our physical and mental health (2, 10). Acupuncture obviously restores the weak informational field (NEMF), which is 1,000 times weaker than the biocurrents of the body, and which I measured with my sensitive patented equipment for almost 40 years.

3 | REVEALING THE SECRETS OF THE FAST RESPONSE (IN TENNIS, FOR SURVIVAL, AND FOR FAST ADAPTATION)

The fact that fast waves propagate on the surface of the body along the acupuncture meridians could also explain the humans' fast response – for a split second a tennis player can figure out where the ball is going to be and be there to hit it. Such fast response

could be done only with fast running waves. Our nervous system is too slow for such fast response. We could explain our ability to respond fast only if our material body lives in symbiosis with NEMF (Spirit), which would allow fast response through the waves of this field. If we are in danger and we need to respond fast, the fast response through the waves of the NEMF (Spirit) would save our life (7).

Should our response depend only on the slow response of the nervous system of the material body, we would be dead long time ago. The presence of NEMF (Spirit) living in symbiosis with the material body allows very fast response through the waves of the NEMF (Spirit), which increases many times our chances for survival. Also, the presence of the NEMF (Spirit), living in symbiosis with the material body, grants us unlimited ability to adapt. The waves of the NEMF (Spirit) scan the environment and send signals to the material body to change to adapt to the new environment (11, 12).

4 | REVEALING THE SECRETS OF THE JUGGLING FAST DYNAMICS

In the journal of Physics Today of February 2020, there was an article “Juggling Dynamics” written by Jonah Botvinick-Greenhouse and Troy Shinbrot (13). They said: “Typical human reaction time is 250 msec per catch. When juggling with 5 balls, the juggler has 120 msec per catch”. And how jugglers can handle 11 balls “is far from clear”. Our explanation is: when fast reaction is necessary the slow nervous system steps back and the NEMF with its fast waves kicks in. Thus, the fast juggling (just as the fast reaction) is done through the waves of our NEMF (Spirit).

5 | REVEALING THE SECRETS OF DIFFERENT WATER CRYSTALLIZATION FOR DIFFERENT PEOPLE

In Strasburg, Austria, interesting experiment was done. Four different students were asked to drop a drop of water, evaporate the water, and see the crys-

tallized water structure. The same water crystalized differently for each of them. Many times repetition was giving the same pattern of crystallization for the same individual. Puzzle? It is not a puzzle! Every individual has its own NEMF, which give specific imprint on the water's NEMF.

6 | REVEALING THE SECRETS OF THE HIGHER SENSITIVITY TO NOISE WITH AGING

In the journal *Physics Today* of February 2020, there was an article: "Noise: from Nuisance to Research Subject" by Roland Wittje (14). It is a known fact that with aging the sensitivity to noise increases. Why? Our answer is because with the aging our NEMF becomes more and more out of balance or shifts out of harmony, which makes the elderly individuals more sensitive to noise.

Very strong negative or positive emotions are like a strong storm (emotional storm) – they destroy the harmony of our NEMF. (Yes, strong positive motions can be just as devastating as strong negative emotions. You must be very careful braking the good news to a cardiac patient that he has won 1 million dollars – the good news can kill him). We need to learn to control our emotions and not to allow extremes, which are devastating.

As mentioned at the end of the Introduction, studies of the HeartMath Institute in California (4) found that mediation on Love makes the EEG and ECG of the material body more harmonic. Since our NEMF rules and regulates the functioning of all our organs, the emotion of Love makes the vibrations of our NEMF (Spirit) more harmonic. Thus, if our NEMF (Spirit) gets out of harmony with the aging, it is because there is not enough love in our life to compensate for the damage of the emotional storms.

I think this makes it clear why Jesus' mission on Earth was to teach us to love one another, to love our neighbors, and to love even our enemies.

7 | REVEALING THE SECRETS OF FAST AND ACCURATE SUBCONSCIOUS COMPUTATION

Daniel Tammet (15), born in UK, suffered epileptic seizures at age 4. Somehow, this bridged the Digital Computer of his Conscious Brain to the Quantum Computer in his Subconscious, which allowed him constant access to the Quantum Super-Computer. This made him a genius. He can calculate p with many digits surpassing the accuracy of the most powerful computers. The fact that he sees the digit numbers visually means that it is done through the Quantum Computer in the Subconscious because the Subconscious works with images (16).

8 | CONCLUSION

Thus, we are symbiosis of material body and weak informational NEMF, which is 1,000 times weaker than the biocurrents of the body. The fast running waves on the surface of this NEMF allow fast response, which increases many times our chances for survival. They are also the basis of: our unlimited possibility to adapt to new environment, our ability to connect telepathically, and our very high rate of computation at Subconscious level.

The fast computation, which some individuals can do, can be explained with the existence of a Quantum Super-Computer in the Subconscious (of which we are not consciously aware) and which works with the waves of our NEMF. Thus, we are not only a material body. Our material body live in symbiosis with NEMF, seen as aura and called Spirit, and benefits a lot from this symbiosis.
